Communication Skills for Engineers II — Communication

UNIT 2 · Professional Email Writing & Vocabulary

What this unit is about

This unit builds understanding of **Professional Email Writing & Vocabulary**. These notes are designed for quick learning and exam revision: learn the meaning, understand the working, practise an example, and finish with comparisons and key terms.

Syllabus coverage checklist

1. Professional email purpose, audience and tone

2. Email structure: subject, greeting, opening, body, action, closing and signature

3. Formal vs informal email; choosing the right register

4. Subject lines, clarity, conciseness and professional etiquette

5. Netiquette, CC/BCC, attachments and response expectations

6. Professional correspondence: requests, follow-ups, apologies and updates

7. Vocabulary building through context, word families and reading

8. Synonyms, antonyms and frequently used workplace vocabulary

How to study: Read each topic once for meaning, underline definitions and formulas, reproduce diagrams/steps without looking, then answer the revision questions on Page 5.

Exam answer pattern

For a 5-mark answer: (1) definition, (2) labelled diagram or formula, (3) working/components in steps, (4) example/application, and (5) one advantage, limitation or comparison.

UNIT 2 NOTES · PART 1

Professional email purpose, audience and tone

A professional email has a specific subject, suitable greeting, purpose-first opening, concise body, clear action/deadline, polite close and signature. Check tone, recipients and attachments before sending.

Write in your own words: Define the concept, list its important parts/steps, and attach one example from a system, program, workplace or numerical problem.

Email structure: subject, greeting, opening, body, action, closing and signature

The OSI model has Physical, Data Link, Network, Transport, Session, Presentation and Application layers. Each layer provides services to the one above and uses the one below; encapsulation adds headers as data moves down.

Write in your own words: Define the concept, list its important parts/steps, and attach one example from a system, program, workplace or numerical problem.

Formal vs informal email; choosing the right register

The OSI model has Physical, Data Link, Network, Transport, Session, Presentation and Application layers. Each layer provides services to the one above and uses the one below; encapsulation adds headers as data moves down.

Write in your own words: Define the concept, list its important parts/steps, and attach one example from a system, program, workplace or numerical problem.

Connect and apply

For a practical question on Professional Email Writing & Vocabulary, first identify which syllabus concept is being tested. State assumptions, draw the relevant structure/flow, work through the steps in order, and finish by interpreting the result. Mention complexity, reliability, accuracy, cost or ethical impact whenever it is relevant.
