CSE STUDY HUB

Communication Skills for Engineers II — Communication

UNIT 5 · Podcasting, Storytelling, Interviews & Reflection

What this unit is about

This unit builds understanding of **Podcasting, Storytelling, Interviews & Reflection**. These notes are designed for quick learning and exam revision: learn the meaning, understand the working, practise an example, and finish with comparisons and key terms.

Syllabus coverage checklist

1. Podcast purpose, audience, format and episode planning

2. Storytelling structure: hook, context, key message and conclusion

3. Interview preparation: research, objectives and question sequence

4. Open vs closed questions; follow-up and probing questions

5. Active listening, turn-taking and discussion moderation

6. Recording basics, clear speech and respectful consent

7. Faculty/senior interactions, career guidance and networking

8. Reflection: lessons learned, strengths, improvement goals and action plan

How to study: Read each topic once for meaning, underline definitions and formulas, reproduce diagrams/steps without looking, then answer the revision questions on Page 5.

Exam answer pattern

For a 5-mark answer: (1) definition, (2) labelled diagram or formula, (3) working/components in steps, (4) example/application, and (5) one advantage, limitation or comparison.

UNIT 5 NOTES · PART 1

Podcast purpose, audience, format and episode planning

Podcast purpose, audience, format and episode planning is a syllabus concept in Communication Skills for Engineers II — Communication. Learn its definition, purpose, key terms and working principle. Organise the explanation into components or steps, then add a practical example, one advantage, one limitation and a comparison with a related concept.

Write in your own words: Define the concept, list its important parts/steps, and attach one example from a system, program, workplace or numerical problem.

Storytelling structure: hook, context, key message and conclusion

Storytelling structure: hook, context, key message and conclusion is a syllabus concept in Communication Skills for Engineers II — Communication. Learn its definition, purpose, key terms and working principle. Organise the explanation into components or steps, then add a practical example, one advantage, one limitation and a comparison with a related concept.

Write in your own words: Define the concept, list its important parts/steps, and attach one example from a system, program, workplace or numerical problem.

Interview preparation: research, objectives and question sequence

Interview preparation: research, objectives and question sequence is a syllabus concept in Communication Skills for Engineers II — Communication. Learn its definition, purpose, key terms and working principle. Organise the explanation into components or steps, then add a practical example, one advantage, one limitation and a comparison with a related concept.

Write in your own words: Define the concept, list its important parts/steps, and attach one example from a system, program, workplace or numerical problem.

Connect and apply

For a practical question on Podcasting, Storytelling, Interviews & Reflection, first identify which syllabus concept is being tested. State assumptions, draw the relevant structure/flow, work through the steps in order, and finish by interpreting the result. Mention complexity, reliability, accuracy, cost or ethical impact whenever it is relevant.

UNIT 5 NOTES · PART 2

Open vs closed questions; follow-up and probing questions

Compare the alternatives in Open vs closed questions; follow-up and probing questions using the same criteria: purpose, working method, performance, cost/complexity, security or reliability, and suitable use case. End with a short conclusion stating when each option is preferable.

Write in your own words: Define the concept, list its important parts/steps, and attach one example from a system, program, workplace or numerical problem.

Active listening, turn-taking and discussion moderation

Active listening, turn-taking and discussion moderation is a syllabus concept in Communication Skills for Engineers II — Communication. Learn its definition, purpose, key terms and working principle. Organise the explanation into components or steps, then add a practical example, one advantage, one limitation and a comparison with a related concept.

Write in your own words: Define the concept, list its important parts/steps, and attach one example from a system, program, workplace or numerical problem.

Recording basics, clear speech and respectful consent

Start with a precise definition of Recording basics, clear speech and respectful consent. Explain its purpose, the problem it solves, its main components and where it is used. In an exam answer, add one practical example and distinguish it from the nearest related concept.

Write in your own words: Define the concept, list its important parts/steps, and attach one example from a system, program, workplace or numerical problem.

Connect and apply

For a practical question on Podcasting, Storytelling, Interviews & Reflection, first identify which syllabus concept is being tested. State assumptions, draw the relevant structure/flow, work through the steps in order, and finish by interpreting the result. Mention complexity, reliability, accuracy, cost or ethical impact whenever it is relevant.

UNIT 5 NOTES · PART 3

Faculty/senior interactions, career guidance and networking

Faculty/senior interactions, career guidance and networking is a syllabus concept in Communication Skills for Engineers II — Communication. Learn its definition, purpose, key terms and working principle. Organise the explanation into components or steps, then add a practical example, one advantage, one limitation and a comparison with a related concept.

Write in your own words: Define the concept, list its important parts/steps, and attach one example from a system, program, workplace or numerical problem.

Reflection: lessons learned, strengths, improvement goals and action plan

Reflection: lessons learned, strengths, improvement goals and action plan is a syllabus concept in Communication Skills for Engineers II — Communication. Learn its definition, purpose, key terms and working principle. Organise the explanation into components or steps, then add a practical example, one advantage, one limitation and a comparison with a related concept.

Write in your own words: Define the concept, list its important parts/steps, and attach one example from a system, program, workplace or numerical problem.

Connect and apply

For a practical question on Podcasting, Storytelling, Interviews & Reflection, first identify which syllabus concept is being tested. State assumptions, draw the relevant structure/flow, work through the steps in order, and finish by interpreting the result. Mention complexity, reliability, accuracy, cost or ethical impact whenever it is relevant.

QUICK REVISION & EXAM PRACTICE

Key takeaways

• **Podcast purpose, audience, format and episode planning** — know the definition, core working and one example.

• **Storytelling structure: hook, context, key message and conclusion** — know the definition, core working and one example.

• **Interview preparation: research, objectives and question sequence** — know the definition, core working and one example.

• **Open vs closed questions; follow-up and probing questions** — know the definition, core working and one example.

• **Active listening, turn-taking and discussion moderation** — know the definition, core working and one example.

• **Recording basics, clear speech and respectful consent** — know the definition, core working and one example.

• **Faculty/senior interactions, career guidance and networking** — know the definition, core working and one example.

• **Reflection: lessons learned, strengths, improvement goals and action plan** — know the definition, core working and one example.

Worked-answer framework

Scenario: A question asks you to explain or apply a concept from Podcasting, Storytelling, Interviews & Reflection. **Step 1:** identify the relevant term and define it. **Step 2:** write the formula, components or ordered process. **Step 3:** apply it to the given data/scenario. **Step 4:** state the result and justify it. **Step 5:** mention one limitation or precaution.

Self-test questions

Q1. Define Podcast purpose, audience, format and episode planning and explain its importance.

Q2. Explain the working/steps involved in Storytelling structure: hook, context, key message and conclusion.

Q3. Differentiate between two related concepts from Podcasting, Storytelling, Interviews & Reflection.

Q4. Give one practical application of Reflection: lessons learned, strengths, improvement goals and action plan and discuss one limitation.

Q5. Write a structured 5-mark answer covering the main ideas of Podcasting, Storytelling, Interviews & Reflection.

Final checklist: I can define every topic · explain the process without notes · reproduce formulas/diagrams · solve one example · compare related concepts.
